

HUSEYIN SERCAN GUNDOGAN

SENIOR FRONTEND ENGINEER

Izmir, Turkey | sercangundogan35@gmail.com | +90 554 799 53 36 | linkedin.com/in/sercangundogan | github.com/sercangundogan | sercangundogan.com

Frontend-focused software engineer with 5+ years of experience building production SaaS, web, and mobile products. Strong in React, TypeScript, Next.js, and React Native, with hands-on backend experience. Experienced in modernizing legacy applications, improving performance, and owning features from development through release.

TECHNICAL SKILLS

Frontend: React, Next.js (App Router / Pages Router), TypeScript, JavaScript, React Native, Redux Toolkit, RTK Query, Tailwind CSS, HTML, CSS
Backend & Data: Node.js, Python, FastAPI, Django, Laravel, REST APIs, MongoDB, PostgreSQL
Tools & Delivery: Git, Docker, CI/CD, Nginx, Sentry, Postman, Figma, Cursor, Claude

PROFESSIONAL EXPERIENCE

Panates - Senior Frontend Developer **Izmir, Turkey | Oct 2026 - Present**

- Developing and maintaining frontend applications, with a focus on code quality, reusable architecture, and user experience.

Sociality.io - Frontend Developer **London, UK (Remote) | Sep 2021 - Oct 2026**

- Built and maintained a SaaS platform serving 100+ enterprise customers across 20+ countries using React, TypeScript, Next.js, React Native, and Laravel.
- Helped lead a gradual migration from Laravel/PHP to React and TypeScript while keeping the production product running.
- Led React Native app development, maintenance, and App Store / Google Play releases.
- Rebuilt the company website with the team using Next.js, improving Google PageSpeed scores from approximately 30-40 to 85-95.
- Developed dashboards, reusable UI components, and API integrations; collaborated with product, design, and backend teams.

Eleport Cloud Services - Software Engineer Intern **Eskisehir, Turkey | Jul - Aug 2021**

- Contributed to an enterprise application using React and Django REST Framework.

Incir R&D - Software Engineer Intern **Eskisehir, Turkey | May - Jul 2021**

- Developed frontend and backend features for a Python/Django decision support system.

SELECTED PROJECT

Rewordly | AI Writing Assistant | Live Product

Built and launched a Chrome extension and web app using Next.js, TypeScript, Supabase, OpenAI API, and Chrome APIs; implemented authentication, AI rewriting, usage limits, subscriptions, and payments. Used by real customers, including paying subscribers.

EDUCATION & RESEARCH

Eskisehir Technical University | B.Sc. Industrial Engineering | 2016 - 2021 | GPA: 3.24/4.00

- TEKNOFEST / TÜBİTAK 2242 research project competition - 3rd place; TÜBİTAK 2209-A research support.
- Co-authored a research paper on exam scheduling and a Python/Django decision support system, published in Technological Forecasting and Social Change (SSCI-indexed, Q1), 2024.

Languages: Turkish (Native), English (Professional Working Proficiency)
